Can you halftone a workset in Revit?

Because you can put multiple categories on a workset the only way to halftone all items on a workset is to check each box in the visibility graphics dialog to be halftoned.

Why are Revit families important in customizing a Revit project?

It helps us to place a particular family in a particular project environment to check how the component is visible. The user can always switch on and off the visibility parameters based on the requirements. Before the advent of Revit, such components were drawn in AutoCAD.
