

# Best answer: How to center viewport in layout autocad?

## Description

If your question is Best answer: How to center viewport in layout autocad?, our CAD-Elearning.com site has the answer for you. Thanks to our various and numerous AutoCAD tutorials offered for free, the use of software like AutoCAD becomes easier and more pleasant.

Indeed AutoCAD tutorials are numerous in the site and allow to create coherent designs. All engineers should be able to meet the changing design requirements with the suite of tools. This will help you understand how AutoCAD is constantly modifying its solutions to include new features to have better performance, more efficient processes to the platform.

And here is the answer to your Best answer: How to center viewport in layout autocad? question, read on.

## Introduction

1. Click Home tab Draw panel Construction Line.
2. Specify a point displayed in the first layout viewport.
3. Click Home tab Modify panel Move.
4. Select the **layout** viewport to align to the first layout **viewport**.
5. When prompted for a base point, specify a point in the second layout **viewport**.

Amazingly, how do I center a viewport model in **Autocad**?

Quick Answer, how do I center a **layout** in Autocad?

1. Select the linework, object or block to **center**.
2. Click Home tab Modify panel Align drop-down Center.
3. Select an existing edge as an axis, and then specify two points between which to **center** the object on that axis; or press Enter, and specify any two points between which to center the object.

Beside above, how do you **center** a paper space in Autocad?

People ask also, how do I align viewport with model space? To select only one point in model space, press Enter at the second model space prompt; then you can align with one paper space point. This option is useful for adjusting the position of the model space view, without changing the zoom factor of the layout viewport.

1. Click a layout tab.
2. Click **Layout** tab Layout Viewports panel Clip.
3. Select either an existing object to designate as the new **viewport** boundary, or specify the points of a new boundary.
4. Click OK.

## How do you center a drawing on paper?

1. In the drawing, select the shapes you need to center. To do that, do the following: Drag a selection net around all the shapes that you want to center. Hold down the SHIFT key and click all the shapes you want to center.
2. On the Home tab, click Align > Align Center.

## How do I resize a viewport in Autocad?

1. Click the Model tab.
2. Click a viewport to make it current.
3. Choose View > Zoom > Zoom.
4. Type the zoom scale factor relative to paper space by appending the suffix xp to the scale factor, and then press Enter.

## How do you move a viewport?

1. Move the screen pointer over the viewport's title bar.
2. Click and hold down the mouse's left button.
3. Drag the viewport to the new location.
4. Release the mouse button.

## Why is my viewport scale not accurate?

Causes: The following could cause the incorrect scale: The layout is corrupt. Page Setup scale is not set correctly.

## How do you center a paper?

## How do you center an orthographic drawing?

## How do you center an isometric drawing?

## Why can't I move my viewport in AutoCAD?

## Where is the viewport scale in AutoCAD?

## How do I move a layout in AutoCAD?

To move/rearrange the layout tab: Click & hold the layout tab with the left mouse button until an icon appears next to your cursor. Drag the layout tab to a new position and release the mouse button where the arrow is pointing.

## How do you move a drawing in AutoCAD layout?

1. Move the cursor over the drawing view to move. The drawing view border appears.
2. Click inside the drawing view border to select the drawing view. A grip appears at the center of the view.
3. Drag the grip to move the drawing view to the desired location.

## How do I fix my AutoCAD scale?

Enter the SCALE (Command). Select a base point, such as 0,0,0. Enter the obtained scale factor to adjust all objects in the drawing model to their correct size.

## How do I match scale in AutoCAD?

1. Click Home tab Modify panel Scale. Find.
2. Select the object to scale.
3. Select the base point.
4. Enter r (Reference).
5. Select the first and second reference points, or enter a value for the reference length.
