

Best answer: How to close all lines in autocad?

Description

If your question is Best answer: How to close all lines in autocad?, our CAD-Elearning.com site has the answer for you. Thanks to our various and numerous AutoCAD tutorials offered for free, the use of software like AutoCAD becomes easier and more pleasant.

Indeed AutoCAD tutorials are numerous in the site and allow to create coherent designs. All engineers should be able to meet the changing design requirements with the suite of tools. This will help you understand how AutoCAD is constantly modifying its solutions to include new features to have better performance, more efficient processes to the platform.

And here is the answer to your Best answer: How to close all lines in autocad? question, read on.

Introduction

Furthermore, how do I close two lines in **AutoCAD**?

1. Click Home tab Modify panel Edit Polyline. Find.
2. Select a polyline, spline, line, or arc to edit.
3. Enter j (Join).
4. Select one or more polylines, splines, **lines**, or arcs that are located end to end.
5. Press Enter to end the command.

Also the question is, how do you **close** an open polyline? To close an open polyline Choose Modify > Object > Edit Polyline. Type editpline and then press Enter. Select the polyline. In the prompt box, choose **Close**.

Also, how do I group all **lines** in **AutoCAD**?

1. Select the objects you want to group.
