Best answer: How to make curved section in revit?

Description

If Revit does not support full-fledged curved sections OOTB, then you cannot create them programmatically either. However, you could perfectly well create something quite similar yourself using the API. The most difficult part to achieve might be full associativity.

Quick Answer, how do you take a curved **section**? Set the **section** view properties: Hold down Shift and on the Views tab, click **Curved** section view. Modify the view properties as required, and click OK or Apply. Pick three points on the cut plane. Pick two points to indicate the cut box.
