

# Best answer: How to make text columns in revit?

## Description

1. Click Annotate tab Text panel .
2. In the Type Properties dialog, select the text properties you want to work with from the Type list.
3. If desired, click Rename to rename the type, or click Duplicate to create a new **text** type.
4. Specify the properties for the display of **text** notes.
5. Click OK.

Correspondingly, how do you insert a textbox in Revit? Click and drag to form a **text** box. For a text note with a one-segment or a curved leader. Click once to place the leader end, draw the leader, and then click the cursor (for non-wrapping text) or drag it (for wrapping text). For a **text** note with a two-segment leader.

Quick Answer, how do you extend text in **Revit**? Use Shift + Enter to add a soft return to the end of a line for additional spacing. Use the shape handles on the **text** element to control the width of the text box. The text automatically adjusts. For example, you can reduce the width of the text box to **make** room for a second column of text.

Beside above, how do I add **columns** in Revit 2021?

1. Click Architecture tab Build panel Column drop-down (Column: Architectural).
