

Frequent question: How to delete duplicate text in autocad?

Description

If your question is Frequent question: How to delete duplicate text in autocad?, our CAD-Elearning.com site has the answer for you. Thanks to our various and numerous AutoCAD tutorials offered for free, the use of software like AutoCAD becomes easier and more pleasant.

Indeed AutoCAD tutorials are numerous in the site and allow to create coherent designs. All engineers should be able to meet the changing design requirements with the suite of tools. This will help you understand how AutoCAD is constantly modifying its solutions to include new features to have better performance, more efficient processes to the platform.

And here is the answer to your Frequent question: How to delete duplicate text in autocad? question, read on.

Introduction

1. Click Home tab Modify panel **Delete** Duplicate Objects. Find.
2. At the Select Objects prompt, use a selection method to select objects.
3. Press Enter.
4. Optional: Specify a Tolerance value. Select properties to ignore during object comparison.

Likewise, how do I find **duplicate** records in AutoCAD? Access the OVERKILL command and select objects to check for duplicate geometry. Press [Enter] to display the Delete **Duplicate** Objects dialog box. See Figure 11A-1. The check boxes in the Object Comparison Settings area control objects to ignore when deleting duplicates.

Subsequently, what is the command for delete in AutoCAD? The selected objects can be removed further by using the Erase command. For example, P (to erase the previous selection set), L (to erase the last selection set), and all (to delete all objects from the drawing). Let's understand with few examples. Type E or Erase on the command line or command prompt and press Enter.

People ask also, how do you overkill in **AutoCAD**? The purpose of the OVERKILL command is to delete any redundant, overlapping lines quickly and efficiently. Instead of going through every line in your drawing to determine where lines are overlapping, you can enter the command OVERKILL. Once you have selected the command, type **OVERKILL** and hit ENTER.

Also the question is, how do you copy and duplicate in **AutoCAD**? Press Ctrl+Shift+C or enter COPYBASE at the command prompt or . Select the base point. Select the objects to copy and press Enter. The objects are now available to be pasted into the same drawing or another drawing. Solution: Select objects in a drawing (use CTRL-A to select everything) and then type OVERKILL on the command line. Click OK on the **Delete Duplicate Objects** dialog window, adjusting settings as desired (the default options are usually sufficient). Overkill deletes information that is overlaying other items.
