

Frequent question: How to make pdf transparent in revit?

Description

PDFs are brought in as a Raster Image, and you can't adjust the transparency of raster images. Believe that is already on the idea station. You can only change it to background or foreground.

As many you asked, how do you make something transparent in Revit? To apply to the entire view, access the transparency slider directly from the Model Display panel on the Graphic Display Options dialog. To apply to a category, filter, or an element, access Surface Transparency by right-clicking in the drawing area, and selecting Override Graphics in View.

Beside above, how do I **make** a filled region transparent in Revit? Expand Filled Region. Right-click the region type name (for example, Filled Region 1) and click Properties. You can set Fill pattern, Background, Line Weight Number, and Color for the region. With Background, you can set it to opaque or **transparent**.

Also the question is, how do you overlay a PDF in **Revit**?

Considering this, how do I make a **PDF** transparent? **Make PDF Background Transparent** Click on the 'Edit' tab, then select 'Background' and choose 'Edit Background' from the drop-down menu. Now a window pops up, and you need to click the Pencil-like icon to edit the background. Then you can click the 'Opacity' icon in the new window, and select 0% in the 'Opacity' option.
