How many types of families are there in Revit?

We can classify all Revit families into three different types: System families, loadable families, and in place families. In most cases, system families are typically assemblies of multiple components and layers.

How do I edit a family wall?

How do you create a furniture family in Revit?

Can you split face a curved wall in Revit?

Split face and Edit Profile work on planar surfaces, only, not on curved surfaces. The alternative, even for flat surfaces, is to model the finish layers as separate wall elements, thin walls with the true thickness and materials. The same applies to floors.
