

# How to check revit version of file?

## Description

1. Open **Revit**.
2. On the Revit home screen, under projects click "Open"
3. Navigate to your project **file** and left click on it once.
4. In the preview window to the right **Revit** now displays the Project version.

Furthermore, what **version** of Revit do I have on my BIM 360? Sign in to the BIM 360 Project Admin module. Go to Services "Document Management" Revit Cloud Model Upgrade. **Check** the "Current Release".

Similarly, how do I know what version of **Revit 2021** I have?

1. Build Version (Control Panel)
2. Build Number.
3. Revit **Version** Number.

Also, how do you tell what year of Revit a **file** is? Finding what version of **revit** a file is without opening Revit. If you right click on a . rvt file and click properties, it only gives you the Date created and the Date modified.

Beside above, how can I check **Revit version** without opening? But the fact is, Revit is not BIM. BIM (Building Information Modelling) is a process/technology/ platform and Revit is one of the many BIM tools/applications available like ArchiCAD, AECOSim, Edificius etc. Thus, a 3D model designed using the Revit application is designed for BIM.

## Where are BIM 360 local files?

The local files for ACC (or BIM 360) are stored at the folder %LOCALAPPDATA%\Autodesk\Revit\Autodesk Revit ####\CollaborationCache, where the #### is your Revit year number. If one of your users still has a file in that folder, it can be used to copy from and replace the existing Cloud Model.

## How do I find my Autodesk version?

Open the program. At the top-right corner of the screen, click the drop-down arrow next to the "?" icon. Select About AutoCAD or About Autodesk AutoCAD. The Product Version is located near the middle on the left side of the window.
