

How to downgrade a family in revit?

Description

Short answer: it's not possible, unfortunately. Long answer: you can use Speckle to **downgrade** /upgrade projects when the elements that you are sending are supported by Speckle. This works because Speckle uses the Revit API to "deconstruct" each element when sending and then "recreate" them when receiving.

Likewise, how do I downgrade a project in **Revit**?

As many of you asked, how do I reduce family size in Revit?

1. Use only native Autodesk Revit geometry (no SAT files sorry!)
2. Keep voids to a minimum where possible.
3. Practice good family nesting (if geometry is used more than once, don't array it, nest it)
4. Check for duplication of geometry in nested families.

Correspondingly, how do you edit a **family** in **Revit**?

1. Select an instance of the family in the drawing area, and click Modify | tab Mode panel (Edit **Family**).
2. Double-click an instance of the family in the drawing area. Note: The double-click editing behavior is determined by the setting for the **Family** element type in the Double-click Options.

Best answer for this question, are **Revit** files backwards compatible? Revit software is not backwards compatible, so the families cannot be used in previous software versions (2015 and below) unless exported to other CAD software. The families can be used in all software versions above 2016.
