4. Draw all Buildings and Structures on the **Plan**.
5. **Draw** Driveway and Parking on the **Plan**.
6. Other Items that must be on the Plan.
7. Locate Grand Trees.
8. Sample Site **Plan**.

Beside above, how do I make a drawing plan in AutoCAD?

You asked, how do I plot a property line in AutoCAD? A location plan is different to a **site** plan which is specifically focused on providing more detail of the development within the site boundaries, or a block **plan** which may give a slightly wider illustration of the immediate area surrounding the **site**.

What is a site plan in construction?

A site plan is a graphic representation of all existing and proposed improvements to a site. Sometimes referred to as a plot plan, the site plan functions as a map for a development project, incorporating all aspects of landscaping, construction, paving, utilities, and terrain features in a single depiction.

What is a site layout plan?

A site layout plan, sometimes called a block plan, shows a detailed layout of the whole site and the relationship of the proposed works with the boundary of the property, nearby roads, and neighbouring buildings. Most applications should include both an existing site layout plan and a proposed site layout plan.
