

How to fix linetype scale in autocad?

Description

After several searches on the internet on a question like How to fix linetype scale in autocad?, I could see the lack of information on CAD software and especially of answers on how to use for example AutoCAD. Our site CAD-Elearning.com was created to satisfy your curiosity and give good answers thanks to its various AutoCAD tutorials and offered free.

Engineers in the fields of technical drawing use AutoCAD software to create a coherent design. All engineers must be able to meet changing design requirements with the suite of tools.

This CAD software is constantly modifying its solutions to include new features and enhancements for better performance, more efficient processes.

And here is the answer to your How to fix linetype scale in autocad? question, read on.

Introduction

To change the **linetype** scale, click the **Linetype** drop-down list in the Properties panel of the Home tab and choose Other to open the Linetype Manager. Click Show Details if the lower portion of the dialog box isn't displayed. In the Global **Scale** Factor text box, type the scale factor that you want. Click OK.

You asked, how do I reset my linetype scale in **AutoCAD**? Globally, just change LTSCALE. Each individual element. Dialog is greyed out with *Varies* in the space. within the drawing file and set the individual "Linetype Scale" to 1.

How do you make a linetype scale the same in viewport?

If you change the viewport zoom factor to 2x, the linetype scaling for the dashed line in the layout and the dashed line in the layout viewport will be the same, regardless of the difference in the zoom factor.

How do you scale a line type?

How do you make linetype scale the same in model and paper space?

1. Enter LINETYPE to open Linetype Manager.
2. Click Show Details.
3. Deselect Use Paper Space Units for Scaling.
4. Click OK.
5. Double-click into the viewport to activate it.
