

# How to get rid of blue lines on tinkercad?

## Description

With this article you will have the answer to your How to get rid of blue lines on tinkercad? question. Indeed TinkerCAD is even easier if you have access to the free TinkerCAD tutorials and the answers to questions like. Our CAD-Elearning.com site contains all the articles that will help you progress in the study of this wonderful software. Browse through our site and you will find different articles answering your different questions.

The use of parametric design in TinkerCAD makes it a powerful tool for designers and engineers. The designer can observe the impact of adjustments on neighboring components or even on the entire solution. This makes it quick and easy for designers to identify and solve problems.

And here is the answer to your How to get rid of blue lines on tinkercad? question, read on.

## Introduction

The new workplane appears as below. You can now drag shapes or text to the new workplane. When you've finished with the extra work- plane, click on the workplane icon then on the workplane to delete it. Hold down Shift on the keyboard and select both objects, click the Align icon.

In this regard, how do I make Tinkercad run faster?

Correspondingly, how do you edit shapes in **Tinkercad**?

Amazingly, how do you make a hole in **Tinkercad**? To make a hole, select the object you want to be a hold, then press the Hold option in the Inspector window that appears when you select the object. You then drag the whole into the object in which you want to have a hole.

People ask also, can I erase in Tinkercad? At the bottom of the new workplane, you'll find some options. You have a redo and and undo button, a drawing tool, and eraser, a shape tool, and a shape tool eraser. For this, lets just stick to the drawing tool.

## How do you delete a block in Tinkercad?

## Is Tinkercad good for 3d printing?

Tinkercad is very useful for 3d printing. You could export your designs in STL and OBJ file formats which are used by 3d printers. You could design basic objects with it. It has no sculpting nor animating features.

## Does Tinkercad need wifi?

Unfortunately, this simply isn't possible with Tinkercad. Despite this request being asked multiple times over the years, Autodesk hasn't committed to making an offline version of Tinkercad.

## Can Tinkercad be used offline?

I'm in the Navy and I'm going out to sea in the future. I'd like to continue to design but Tinkercad doesn't have an offline version.

## How do you hide the Workplane in Tinkercad?

## What is snap grid in Tinkercad?

The snap grid feature in Tinkercad allows you to make smaller or larger movements. Snap grid is hidden in the bottom right corner of the design area. Click the black drop down arrow to see the snap grid options. The lower the number, the higher the precision by which you move shapes.

## How do you smooth in Tinkercad?

## Is TinkerCAD good for beginners?

Tinkercad is probably one of the simplest and most intuitive 3D modeling tools available. It runs in your web-browser and is free, a combination that makes it the go-to software for beginners. In order to learn the basics of Tinkercad, we'll design a simple wrench.

## What does HOLE do in TinkerCAD?

A hole in TinkerCAD is a shape that when grouped with another object, will remove material instead of joining together. This is kind of like a hole punch. Everything in the path of the hole punch will be removed. To create a hole, select an object and click the "Hole" button near the top right.

## How do you make a face on TinkerCAD?

## Can you edit in Tinkercad?

## How do you use Workplane in Tinkercad?

## Where is Scribble in Tinkercad?

The Scribble shape is one of the latest features added to the Tinkercad Basic Shapes menu. By dragging it on to your workplane, you'll be given a new view that allows you draw shapes with your mouse pointer (or fingertip, if you're using a touch screen). Be sure to check out some of drawing options across the bottom.

## Is TinkerCAD a coding?

Tinkercad's new Codeblocks computational design workspace is the simplest place to make 3D models using draggable blocks of code. Learn basic design and coding principles in an easy-to-learn workspace using Scratchblocks 3.0 as seen in MIT's Scratch application.

## What is the Inspector window on TinkerCAD?

The Inspector is a floating window that lets you change object properties, control cameras and manage storesys. The Inspector window is sensitive to the type of the selected object. It displays the current settings for this object and lets you modify them.

## Wrapping Up:

I believe I have covered everything there is to know about How to get rid of blue lines on tinkercad? in this article. Please take the time to look through our CAD-Elearning.com site's TinkerCAD tutorials section if you have any additional queries about TinkerCAD software. In any other case, don't be hesitant to let me know in the comments section below or at the contact page.

The article provides clarification on the following points:

- How do you delete a block in Tinkercad?
- Is Tinkercad good for 3d printing?
- Does Tinkercad need wifi?
- What is snap grid in Tinkercad?
- How do you smooth in Tinkercad?
- What does HOLE do in TinkerCAD?
- How do you make a face on TinkerCAD?
- How do you use Workplane in Tinkercad?
- Where is Scribble in Tinkercad?
- What is the Inspector window on TinkerCAD?
