How to hide lines in fusion 360?

Description

With this article you will have the answer to your How to hide lines in fusion 360? question. Indeed Fusion 360 is even easier if you have access to the free Fusion 360 tutorials and the answers to questions like. Our CAD-Elearning.com site contains all the articles that will help you progress in the study of this wonderful software. Browse through our site and you will find different articles answering your different questions.
The use of parametric design in Fusion 360 makes it a powerful tool for designers and engineers. The designer can observe the impact of adjustments on neighboring components or even on the entire solution. This makes it quick and easy for designers to identify and solve problems.
And here is the answer to your How to hide lines in fusion 360? question, read on.

Introduction

Also know, how do you **hide** sketches in Fusion 360? Go to Solution. You should be able to click on the lightbulb symbol next to the sketch in the browser to turn it off. Thank you very much.

Similarly, how do you change visibility in **Fusion** 360? If the model is a complex assembly, the easiest way to turn on all visibility is by right-clicking the top-level component and selecting â€œShow All Bodiesâ€•. This will turn on the visibility of all bodies in the entire model.

People ask also, how do you remove mesh lines in Fusion 360?

Beside above, how do you fill gaps in **Fusion** 360?

1. Press the â€œFill Gapsâ€• button in the â€œSketchâ€• panel.
2. Enter a gap width.
3. Select the fill or join mode.
4. Check the delete double checkbox to delete double **lines**.
5. Check the project geometry checkbox to project the geometry to a new sketch.
6. Press â€œOKâ€• button.

What are purple lines in Fusion 360?

Purple is Projected. To edit them, you have to break the link to the original. If the second sketch has a dimension to the edge of the body, Fusion has projected that purple line in for the dimension to make sense.

How do you make a construction line in Fusion 360?

How do you make all components visible in Fusion 360?

1. Go to Your Avatar at the top right of Fusion 360.
2. Go to Preferences.
3. Go to Design.
4. Un-tick Active component visibility.

How do you view wireframe in Fusion 360?

Select View tab > Appearance panel > Wireframe. Any surfaces and solids that are shaded or that have hidden lines are shown as wireframes, for example: All views in the currently selected window are displayed as wireframes. The objects are fully transparent with all the lines visible.

How do you show normal to plane in fusion?
