What is Ortho command in AutoCAD?

Ortho mode is used when you specify an angle or distance by means of two points using a pointing device. In Ortho mode, cursor movement is constrained to the horizontal or vertical direction relative to the UCS.

How do you break a line into equal parts in AutoCAD?

1. Click Home tab Draw panel Point drop-down Divide. Find.
2. Select a line, circle, ellipse, polyline, arc, or spline.
3. Enter the number of intervals. A point is placed between each interval.

How do I continue a polyline in AutoCAD?

The tool continues an existing polyline with more vertexes. Point the new vertex: Specify the next point for polyline. Continue specifying next point or ESC to exit.

How do I use the MEASURE command in AutoCAD?

1. Click MEASURE.
2. Choose Area.
3. Specify points. Use object snaps for precision.
4. When finished selecting points, press Enter.

What is line-lock used for?

A line-lock allows you to lock the front brakes independently of the rear brakes, so the car stays put while the tires smolder. The device is basically an electric solenoid, controlled by a switch on the shifter. With the brakes applied, the driver depresses and holds the switch, then releases the brake pedal.
