What is a viewport in AutoCAD?

Viewports allow you to create different views of the objects in your model space and display them on the printed page from different angles and at different scales.

What is a sheet layout?

A layout is a 2D working environment for creating drawing sheets. The area within a layout is called paper space, where you can add a title block, display scaled views of model space within layout viewports, and create tables, schedules, notes, and dimensions for your drawing.

How do you make a set of sheets?

From the Application menu, choose New > Sheet Set. In the Create Sheet Set wizard, select Existing drawings. 2. Specify the name and location for the sheet set file.

How many viewports can you have in a drawing?

Sets the maximum number of viewports that can be active at one time in a layout. Initial value for this variable is 64, which is the maximum value allowed. I don't think we ever need to create more than 64 viewports in a layout, so in most situations, this value is acceptable. This value is set for each drawing.

How many viewports are in AutoCAD?

There are two types of viewports in AutoCAD. Model Space viewports and Layout space viewports. Viewports are areas that display different views of your drawing and/or model. Layout viewports are objects that you can scale to display the view of your drawing on a layout tab for publishing and production.
