How do you make walls thicker in Tinkercad?

Click on the height node (gray box in the middle of the top of your box object). This will display the height (in inches) of your box. Click on the dimension (1 in this case) and change it to 0.1. In my experience, 0.1 inches is a good thickness for walls for an enclosure like this.

How do you make a 3d model in Tinkercad?

How do you make movable parts in Tinkercad?

Is Tinkercad better than blender?

Tinkercad is a great free online CAD editor but Blender is a way better offline alternative. Tinkercad is very easy to get started with understanding the fundamentals of 3d modelling but itâ€™s limitations of number of designs and polygons is a deal breaker.

Is Tinkercad better than SketchUp?

Like Tinkercad, SketchUp is a browser-based design program but it is much more in-depth than Tinkercad. SketchUp also has a much steeper learning curve. There are three versions of SketchUp: Free, Shop, and Pro. The free version is fairly basic but does allow for detailed design and each version adds more features.
