

How to make room tags visible in revit?

Description

First in your model **make** sure “Rooms” are turn on under Visibility Graphics > Model tab. Then turn on Room **tags** under the annotation tab.

Amazingly, why are room tags not showing up? Right-click atop the room and Unhide the room element to see if your **Room** Tag appears. If you find that the **room** was not hidden in the view and the tag does not show up after placement, then you may have some Plan Region interferences, which is worth investigating.

Also know, why is **room** not showing in Revit? By default, rooms do not display in plan views and section views. However, you can change visibility/graphic settings to make rooms and their reference lines **visible** in these views. These settings become part of the view properties. Tip: Create view templates with the desired room visibility settings.

Correspondingly, how do I make a room tag transparent in Revit?
