How to remove dimensions in sketchup?

Description

With this article you will have the answer to your How to remove dimensions in sketchup? question. Indeed Sketchup is even easier if you have access to the free Sketchup tutorials and the answers to questions like. Our CAD-Elearning.com site contains all the articles that will help you progress in the study of this wonderful software. Browse through our site and you will find different articles answering your different questions.
The use of parametric design in Sketchup makes it a powerful tool for designers and engineers. The designer can observe the impact of adjustments on neighboring components or even on the entire solution. This makes it quick and easy for designers to identify and solve problems.
And here is the answer to your How to remove dimensions in sketchup? question, read on.

https://caddikt.com/

Introduction

1. Double click on the dimension and then select an extension line.
2. Click on the Stroke Color box in Shape Style.
