

How to rename scope box in revit?

Description

In a plan view, click View tab Create panel (Scope Box). On the Options Bar, enter a name and specify a height for the scope **box**, if desired. Tip: You can also change the name of the scope box after creating it. Select the **scope** box, and on the Properties palette, enter a value for the Name property.

Additionally, can you edit a scope **box** in Revit? Open a plan or 3D view, and select the scope box. Handles appear on the scope box. Drag the handles to resize the scope box. As you resize the scope **box**, if a view plane no longer cuts through the **scope box**, the scope **box** is not visible in that view.

Beside above, how do you reset a scope **box** in **Revit**?

Amazingly, how do you make a Scope Box section in Revit?

1. In a plan view, click View tab > Create Panel > **Scope** box.
2. On the Options Bar, enter a name and specify a height for the **scope box**.
3. To draw a scope box, click the upper left-hand corner to start the box. Click the lower right-hand corner to finish it.

Furthermore, what is scope box in Revit? The **Scope** Box object is a 3D Element that defines a three-dimensional box that you can then use to set the Extents of your Datum Elements or your View Extents. So, the Datum Elements include: Levels, Grids, and Reference Planes. So we can use the **Scope Box** to size each of those Elements. In **Revit**®, the “Section Box”™ command is used to clip the viewable portion of a 3D view. You can activate it simply by checking the Section Box entry in Properties “Extents. After enabling the section box, you can modify its extents using “drag”™ controls in the 3D view.

How do you make a new scope box?

In a plan view, click View tab Create panel (Scope Box). On the Options Bar, enter a name and specify a height for the scope box, if desired. Tip: You can also change the name of the scope box after

creating it. Select the scope box, and on the Properties palette, enter a value for the Name property.
