# How to see all levels in revit?

### Description

Likewise, how do you **see** levels in Revit? Select the tag for the section or elevation with the missing **levels** (or select the crop region within the affected view). In the Properties dialog click the button for Far Clipping. Select the No clip checkbox and click OK. If the No clip setting doesnâ€™t lead to a solution, try selecting Clip with Line.

Additionally, why canâ€™t I see my levels in Revit?

Subsequently, how do I get my **Revit** level back?

https://caddikt.com/

1. Select the scope box tool in plan and draw a box to the full extents of your model.
2. Go to an elevation and drag the boxes top and bottom points so the box contains **all** model elements.
3. Draw a new level in elevation by either creating a new level or just copying an existing one up or down.

Considering this, how do you show **levels** on a plan? On a drawing or plan, it will be shown by a symbol placed at the exact spot where the level applies, followed by the numbers for the proposed or existing level. The examples below show three different ways of showing this. To indicate the slope and shape of the ground surface, youâ€™ll use contour lines.- Right click on a blank area of the elevation view to open the context menu, choose maximize 3d extent and **see** if you can see the Level now.
