Introduction

You asked, why are dashed lines not showing in AutoCAD? Most likely your line type scale is set too low. Select your line you want dashed and open the properties on it. Mostly likely it will be 1.0 increase it to around 30 and see how that looks.

Additionally, how do you make a **broken** line in **AutoCAD**?

Quick Answer, how do I **show** dashed **lines** in Paperspace? Double-click inside it and zoom in to your example. Then double-click outside the viewport to return to paperspace. Click on the viewport to highlight it, and change its scale to $1/4 \times 10^3 = 1 \times 10^2$. You should see the dashed line in the sample, similar to how it shows in modelspace.

Subsequently, why are my **lines** dashed in **AutoCAD**? Causes: The linetype scale is too large or too small for the size of the affected object. There is a problem with the display driver on the system. The linetype property of the line itself is Continuous, while its layer is assigned the desired linetype. To make AutoCAD actually draw the lines with a dashed symbol, first zoom in closely to a line feature, then enter 'Linetype' at the command prompt to open the Linetype Manager. Click the Load button, and

select the specific Linetype to apply to the features.
