Show Hidden Lines in the Current Viewport Select the viewport in which you want to show hidden lines. Click View tab Palettes panel Properties palette. On the Properties palette, under Misc, in the Shade Plot field, select As Displayed.

Considering this, why dotted lines are not showing in AutoCAD layout? In most cases, your issue will be related to linetype scale (LTSCALE) as it relates to Paper Space linetype scale (PSLTSCALE). However, you may have your measurement units mistakenly set to Metric when your drawing is meant to be in Imperial units (or vice versa), which can also affect the appearance of dashed lines.

Correspondingly, why are my hidden lines not showing in paper space? (If you do not see this option, click on the "Show Details" tab in the upper right corner of the dialog box and it will appear) You will have to "regenall" in the Paper Space area to show the changes. You will need to do this for each layout in the drawing.

Amazingly, why are my lines not showing up in AutoCAD? Check the Shade Plot setting in the plot options and change it from As Displayed to Wireframe. Check for layer states that could be overriding or misapplying layer settings. On the command line in AutoCAD, enter the LAYERSTATE command. Select a different layer state and click Restore.
