1. Click Home tab Layers panel Layer Properties. Find.
2. Select the layers you want to turn on or **off**.
3. Click the icon in the On column to set the status of the selected layers. = on. = off.

What is the difference between turning off a layer and freezing it?

When a layer is frozen, AutoCAD releases it from memory and no longer has to account for it during a regeneration. To help with performance, freeze the layer and keep in mind that the layer will no longer be seen. If the layer is supposed to be temporary unavailable on the screen, turn the layer off.
