The objective of the CAD-Elearning.com site is to allow you to have all the answers including the question of How to use keyboard shortcuts in sketchup?, and this, thanks to the Sketchup tutorials offered free. The use of a software like Sketchup must be easy and accessible to all.

Sketchup is one of the most popular CAD applications used in companies around the world. This CAD software continues to be a popular and valued CAD alternative; many consider it the industry standard all-purpose engineering tool.

And here is the answer to your How to use keyboard shortcuts in sketchup? question, read on.

Introduction

Select SketchUp > Preferences. In the **SketchUp** Preferences dialog box that appears, select **Shortcuts** in the sidebar on the left. In the list box, select the command to which you want assign a keyboard shortcut. If your selection already has a **keyboard** shortcut assigned to it, that shortcut appears in the Key column.

Best answer for this question, what are the keyboard **shortcuts** for SketchUp?

1. Select (Space bar)
2. Line (L)
3. Eraser (E)
4. Arc (A)
5. Rectangle (R)
6. Circle (C)

Additionally, how do I activate keyboard shortcuts? Right-click the shortcut, and then click Properties. In the Shortcut Properties dialog box, click the Shortcut tab. Click in the Shortcut key box, press the key on your **keyboard** that you want to **use** in combination with Ctrl + Alt (keyboard shortcuts automatically start with Ctrl + Alt), and then click OK.

Amazingly, why are shortcuts not working in SketchUp? There's an option to reset the shortcuts to default in the preferences, this helped me in this case in the past. As Cotty said, easiest way to get shortcuts working in SketchUp is: Window > Preferences > Shortcuts > Reset All (in Mac Preferences can be found from **SketchUp**-menu).

Correspondingly, how do I change hotkey in **SketchUp**?

1. Select Window > Preferences.
2. In the Preferences dialog box that appears, select **Shortcuts** in the sidebar on the left.
3. In the Function list box, select the command to which you want assign a **keyboard** shortcut.

SketchUp Feature Requests.

How do you create a Key in SketchUp?

Why won't my keyboard shortcuts work?

Keyboard shortcuts could fail to work if you don't press the key combinations at the same time. If you are having difficulties pressing multiple keys at the same time, you should enable Sticky Keys. This Windows 10 feature allows you to press the shortcut keys one after another.

What do I do if my shortcut keys wont work?

1. Step 1: Launch the Windows Settings menu and select "Ease of Access."
2. Step 2: Go to the Interaction section on the left-hand menu and select Keyboard.
3. Step 3: Finally, toggle on the "Use Sticky Keys" option.

Why are shortcuts not working?

Whichever problem you are having with your media keys, adding in the FN key to your shortcut will solve it. For example, if F12 for Save As is not working in Word, Excel, or PowerPoint, that probably means that your media keys are dominant. You can just hit FN + F12 and your "save as" keyboard shortcut will work.

How do I control SketchUp?

1. Spacebar " Select tool.
2. R " Rectangle tool.
3. L " Line tool.
4. M " Move tool.
5. P " Push/pull tool.
6. S " Scale tool.
7. Q " Rotate tool (This is one with a weird letter. But I remember it because the letter Q is round, and has a "handle" on it.
8. E " Eraser tool.

What is the shortcut Key for the paint tool in SketchUp?

So, all you need to do is press B, and then hold down the ALT key to sample any material in the model view, let up when the current material is set as you wish, and paint away as many objects as desired.

How do you repeat a command in SketchUp?

SketchUp does not have a command driven interface. Once a SketchUp tool is activated, it remains active until another tool is selected. This means a user can use the MoveTool successively on as many objects as they wish – no “repeat” necessary.

How do I move around in SketchUp?
