AutoCAD can be considered as one of the most popular CAD programs. Therefore, companies and industries use it almost everywhere. Therefore, the skills of this CAD software are very advantageous and in demand due to the highly competitive nature of the design, engineering and architectural markets.

And here is the answer to your How to zoom extents in autocad? question, read on.

Introduction

If you double-click with the mouse wheel, you will activate the Zoom Extents command. This will zoom out or in to fit all of the objects in your drawing to the edges of the screen so you can see the entire drawing.

Frequent question, what is the command for **zoom** extents in AutoCAD? How to **Zoom** to Extents. This important command is incredibly fast and easy: Type ZOOM in the Command line, then type E for Extents when prompted. Your view on the screen will zoom to show the outward boundaries of your drawing.

Also, how do you **zoom extents** in AutoCAD 2021? You can also zoom to the extents of the current drawing from the View tab on the ribbon, or to the **extents** of a specific Display Manager layer by right-clicking the layer and clicking Zoom To Extents. Select the drawings you want. Click OK. The display zooms to the **extents** of the selected drawings.

Also know, how do you fix **zoom** extents?

1. Ungroup everything in the drawing (i.e., select all and then UNGROUP).

2. Select all in the drawing and then hold the shift key down while drawing a window selection around desired geometry.
3. Use the ERASE command, enter ALL, then shift-window-deselect the objects to keep, and press Enter to finish the command.

Amazingly, how do I zoom in **AutoCAD** drawing? Holding down the pick button at the midpoint of the window and moving vertically to the top of the window zooms in to 100%. Conversely, holding the pick button down at the midpoint of the window and moving vertically to the bottom of the window zooms out by 100%. When are creating viewports or copying layout tabs and when you double click the viewport to activate it will **zoom** extent. Because you need to change the scale, regen or zoom to a different location your viewport does an automatic zoom extend.
