

Microstation delete outside fence?

Description

https://caddikt.com/

Microstation delete outside fence? , this article will give you all the information you need for this question. Learning Microstation may seem more complicated than expected, but with our multiple free Microstation tutorialss, learning will be much easier. Our CAD-Elearning.com site has several articles on the different questions you may have about this software.
Microstation can be considered as one of the most popular CAD programs. Therefore, companies and industries use it almost everywhere. Therefore, the skills of this CAD software are very advantageous and in demand due to the highly competitive nature of the design, engineering and architectural markets.
And here is the answer to your Microstation delete outside fence? question, read on.

Introduction

1. Use CAD platform tools to draw a fence (MicroStation only) or digitize and select a shape around the area for which to keep the images in the image list.
2. Select Delete / Outside fence command from the Images pulldown menu.

Best answer for this question, how do you delete a fence in MicroStation?

1. Open the list of saved fences and select the one we want to delete.
2. The colour of the fence will change to highlight it.
3. Select the fence using the Element Selection tool and press delete button from the keyboard.
4. The fence has now been deleted.

You asked, how do you edit a fence in MicroStation? You can open the toolbox by clicking and holding the data point on the Place Fence icon and selecting the Open â€˜Fenceâ€™ as Toolbox option. You can use the tools on the Fence toolbox to place, modify, or move a fence.

Quick Answer, how do I delete unused levels in MicroStation?

1. Select the menu item File > Compress > Options to open the Compress Options Dialog.
2. Place a checkmark against â€˜ Delete Unused Levels â€˜
3. Optional â€“ Check the â€˜ Include References â€˜ option.
4. Select â€˜ Compress â€˜

Also the question is, how do I reset origin in MicroStation? In order to reset the global origin to the center of the design cube, the following key-in can be utilized: GO=0,0,0;xy=0,0,0|uor.

How do you fence a sheet in Microstation?

1. Open Key-In Dialog Box, Type in â€œFence Fileâ€• or â€œFF=â€•
