

Question: How to make a break line in microstation?

https://caddikt.com/

Description

If your question is Question: How to make a break line in microstation?, our CAD-Elearning.com site has the answer for you. Thanks to our various and numerous Microstation tutorials offered for free, the use of software like Microstation becomes easier and more pleasant.
Indeed Microstation tutorials are numerous in the site and allow to create coherent designs. All engineers should be able to meet the changing design requirements with the suite of tools. This will help you understand how Microstation is constantly modifying its solutions to include new features to have better performance, more efficient processes to the platform.
And here is the answer to your Question: How to make a break line in microstation? question, read on.

Introduction

1. Unpack the ZIP archive to a suitable location, such as ..OrganizationWorkspaceStandardsmacros.
2. Start the tool with the **MicroStation** keyin vba run [Breakline]modMain.main.
3. The tool pops its UserForm.

Similarly, how do you create a multi-line in MicroStation? To set up your multi-lines, select Element menu > Multi-**line** Styles. Profile/EndCaps and Joints tabs â€“ Whether you want to change one of the lines, the caps or the way joints are handled. Level, Color, etc. â€“ You can set the attributes of each line in the multi-line independent of the others.

Also, how do I change **line** spacing in MicroStation? Solution. This spacing is set in the Element> Dimension> Tolerance> Lower Margin dimension setting.

Beside above, how do you drop an element in MicroStation?

1. Select the element(s).

2. Select the Drop Element tool.
3. Turn on the appropriate tool settings to specify the element type(s) on which to operate.
4. Accept the settings and initiate the drop. Only the selected elements of the specified type(s) are dropped.

Best answer for this question, where are snaps in **MicroStation**? In **MicroStation** CONNECT there is no tool or menu option labeled Button Bar. To display the Snap Mode tool box do the following: Select the Snap icon on the MicroStation status bar has you have always done before. In the ribbon pop-up select the Snap Mode icon.

1. Select the Create Complex Shape tool.
2. Set Method to Manual.
3. Identify the first element.
4. Continue to identify elements to add to the shape. The elements are connected as they are identified, unless they already are connected.
5. If the first and last elements connect, accept the shape.
