Quick answer: How to create new area type in revit?

Description

As many you asked, how do I create a new **type** of area plan in Revit? Click Home tab Room & Area panel Area drop-down (**Area** Plan). In the New **Area** Plan dialog, for **Type**, select an **area** scheme. Select a level for the area plan view. If you select more than one level, **Revit** Architecture creates a separate **area** plan for each level and groups them by area scheme in the Project Browser.

Considering this, how do you create a **new** type of area plan?

1. Select Architecture > Room & Area > Area > **Area** Plan.
2. The **New** Area Plan dialog box will show.
3. Repeat for all other area scheme options and required floor plans.
4. Open the area plans in turn and from the View Properties change the Visible In Option property to show the correct option.
