

Quick answer: How to create new area type in revit?

Description

As many you asked, how do I create a new **type** of area plan in Revit? Click Home tab Room & Area panel Area drop-down (**Area Plan**). In the New **Area Plan** dialog, for **Type**, select an **area** scheme. Select a level for the area plan view. If you select more than one level, **Revit** Architecture creates a separate **area** plan for each level and groups them by area scheme in the Project Browser.

Considering this, how do you create a **new** type of area plan?

1. Select Architecture > Room & Area > Area > **Area Plan**.
2. The **New** Area Plan dialog box will show.
3. Repeat for all other area scheme options and required floor plans.
4. Open the area plans in turn and from the View Properties change the Visible In Option property to show the correct option.

You asked, how do you **create** an area parameter in **Revit**? You can add a Shared Parameter as a Project Parameter to both "Areas" and "Rooms" Category. Go to: Manage > Project Parameters > Find the parameter in question, Modify and tick Areas box. Go to: Manage > Project Parameters > Find the parameter in question, Modify and tick Areas box.

Frequent question, what are the default **area** types in Revit? **Area** type values come from the default area schemes: Gross Building and Rentable. The Gross Building area scheme has 2 **area** type values: Gross Building **Area**, and Exterior Area.

1. Open an area plan view.
2. Click Architecture tab Room & Area panel Tag Area drop-down (Tag Area).
3. On the Options Bar, do the following: Indicate the desired orientation of the **area** tag.
4. Click in an area to place the tag. Note: If areas overlap where you click to place a tag, then only one area is tagged.

How do you create a gross area plan in Revit?

From the Revit Architecture ribbon, select Home/Area Plan. Area Plans will appear in their own "Area Plans (Gross Building)" section of the Revit Project Browser.
