

Quick answer: How to resize a viewport in autocad?

https://caddikt.com/

Description

Quick answer: How to resize a viewport in autocad? , this article will give you all the information you need for this question. Learning AutoCAD may seem more complicated than expected, but with our multiple free AutoCAD tutorialss, learning will be much easier. Our CAD-Elearning.com site has several articles on the different questions you may have about this software.
AutoCAD can be considered as one of the most popular CAD programs. Therefore, companies and industries use it almost everywhere. Therefore, the skills of this CAD software are very advantageous and in demand due to the highly competitive nature of the design, engineering and architectural markets.
And here is the answer to your Quick answer: How to resize a viewport in autocad? question, read on.

Introduction

1. Click the Model tab.
2. Click a **viewport** to make it current.
3. Choose View > Zoom > Zoom.
4. Type the zoom scale factor relative to paper space by appending the suffix xp to the scale factor, and then press Enter.

Also, how do I change viewport size in AutoCAD?

1. Select the layout viewport that you want to modify.
2. Right-click, and then choose Properties.
3. If necessary, click Display Locked and choose No.
4. In the Properties palette, select Standard Scale, and then select a new scale from the list. The scale you choose is applied to the viewport.

As many you asked, how do I resize a layout in **AutoCAD**? In the Page Setup Manager, Page Setups area, select the page setup that you want to modify. Click Modify. In the Page Setup dialog box, under Paper Size, select a paper size from the list. Click OK.

Similarly, how do I edit an existing viewport?

1. Select the **viewport**.
2. Select Modify > Edit Viewport.
3. Click Design Layer and select the design layer to edit from the list.
4. Choose how the design layer will display.
5. If the **viewport** has been cropped, select Add Reference Crop Object to display the crop on the design layer.

You asked, what command do you use to scale a viewport? Double click within the **viewport** boundaries. Then, type Zoom and the Command Line. Next, enter the scale you would like to use. In this case, Iâ€™ll use 1/50.

1. Press Shift while dragging to maintain the original aspect ratio.
2. If you donâ€™t see the handles, toggle them by selecting View > Responsive > Viewport **resize** handles in the top menu.
