Revit cant select wall?

Description

1. Place the cursor on or near one wall or line, and click to select it.
2. Press Tab . Revit highlights the second **wall** or line that is closest to the cursor.
3. Press Tab again to highlight all of the connected walls or lines. Then click to **select** them.

Likewise, why are my walls greyed out in Revit? If the walls are not displayed as an underlay then you will need to check phases and phase filter of your view together with phase overrides, alternatively look at other possible graphic overrides. I note it is not just the walls that are greyed out, but elements that seem to be from an Architecture file.

You asked, why canâ€™t I **select** floor Revit? If â€œFloorsâ€• doesnâ€™t show up as a category, then either the floor was in a design option/phase as outlined by the previous poster, or it doesnâ€™t exist. 2: Since you say it DOES exist, and that you can select it in another view, then **select** it in the other view and Ctrl-Tab until your floor plan view is open.

Quick Answer, how do you select in **Revit**?

1. While pressing Ctrl , click each of the elements.
2. Draw a selection box by placing the cursor on one side of the elements to be selected and dragging it diagonally to form a rectangular boundary.
3. Press Tab to highlight connected elements, and then click to select.

Moreover, what does the Tab key do in **Revit**? TAB can be used to cycle between overlapping or nearby objects in 2d or 3d views. It can be used to cycle through alternate points to dimension to or through alternate running object snaps.

How do you use the selection filter in Revit?

1. Select all elements in the Revit model.
2. Open the Selection Filter (found under the Modify > Selection tab)
3. Uncheck what you want to exclude from the Selection or select â€˜Check Noneâ€™ and then choose the categories you want to include in the selection.

Why are my visibility settings greyed out in Revit?

The Visibility/Graphics window will be greyed out (as shown above) if its included in the View Properties of the View Template. So make sure you go into the View Template and update the Visibility/Graphics or change settings to not included Visibility/Graphics.

How do I unlock a Revit file?

Just click on view template in the properties panel and then click on model ovverides etc. Or select â€œnoneâ€• in view template list, click ok. Now you can type vv or vg and manually control all. If it is a central/workshared file you have to â€œdetach from centralâ€• first.

Why are all visibility and Graphics greyed out in Revit?

If the Visibility/Graphic Overrides options are greyed out, it is because the file has a View Template attached.
