You asked, can you delete **Revit** backup files?

Subsequently, where does **Revit** store backup files? Backup Files Each time you **save** locally and synchronize to the central model a backup file is created. Your local backups folder will generally be saved in your documents folder on your machine. The backups folder for the central file will be in the same folder as the Revit model file.

Similarly, how often does Revit autosave? It appears as a button on the add-ins tab, but clicking on it will fire up the normal Revit options screen. However, there is an extra option towards the bottom of the screen where autosave options can be set. The default Autosave interval is 5 minutes, which I personally think is too frequent.

Does Revit save automatically?

You can't set an Auto Save in Revit, only set a reminder. This can be done by clicking on the Applications Menu, then selecting Options (bottom left). In the General section "Notifications", you can set the Save reminder interval to 15 or 30 minutes, 1, 2, 4 hours, and No reminder.
