Also, how do I insert a sheet into another **Revit**?

1. Open the project where you want to reuse existing views or **sheets**.
2. Click Insert Import panel Insert from File drop-down (Insert Views from File).
3. In the Open dialog, navigate to the project that contains the desired views or sheets, select it, and click Open.

Frequent question, how do you copy an entire sheet in Revit?

1. Open the project.
2. Select a sheet in the Project Browser.
3. Right Click, click Duplicate Sheet and select one of the options, as follows: Duplicate Empty Sheet â€“ A new sheet is created with only the titleblock, information, and any project/shared parameters used by the titleblock.

In this regard, how do I copy floor plans from one Revit file to **another**? While Revit allows inserting Drafting views and schedules from an existing project, it does not have built in options to allow copying/inserting 3D / Plan views between different **Revit** projects. If you are looking re-use just a few views, then it would probably be simpler to create new views in the new project.

## How do I merge Revit files?

1. Select the Linked File â€“ Modify â€“ Bind Link â€“ the Linked File will become a Group inside the host file.
2. Un-grouping the items from the former Linked File can now be modified and integrated into the host file.

## Can you duplicate sheets in Revit 2021?

If you are using Revit 2021 or earlier unfortunately there is no duplicate or copy tool. Your only option is to create a new sheet and place views as desired.

## How do you duplicate multiple sheets in Revit?

## How do I copy a sheet in Revit 2021?

## How do I copy a Revit model into a new template?

Go to Solution. Create new project using your new template, link the old model. Then select the link, bind it and ungroup. Btw you could consider using Transfer Project Standards to add new or overwrite settings.
