Our CAD-Elearning.com site has several articles on the different questions you may have about this software.

AutoCAD can be considered as one of the most popular CAD programs. Therefore, companies and industries use it almost everywhere. Therefore, the skills of this CAD software are very advantageous and in demand due to the highly competitive nature of the design, engineering and architectural markets.

And here is the answer to your You asked: How to change multileader text color in autocad? question, read on.

Introduction

Put all the leaders on the same layer and set the **color** of the layer to be the **color** of the **text** you want. Then select all the leaders at once and open the properties box. Under 'Leader' bar should be a 'Leader **Color**' Option. Set that to what ever color you choose if different from the color of the **text**.

Similarly, how do I edit **Multileader** text in AutoCAD? To edit an MLeader style, select it in the Multileader Style Manager and click Modify. You can then modify a number of settings that apply to the selected MLeader style. Use the Leader Format, Leader Structure, and Content tabs to edit the corresponding settings.

Likewise, how do you **change** the color of text in AutoCAD? Click the Text tab. In the Text color list, select a color for **text**. In the Text height box, type the new text height. Click OK until all dialog boxes close.

In this regard, what is Multileader in **AutoCAD**? Multileaders is a new feature in **AutoCAD** 2008 that helps you create leaders with more control and flexibility. With Multileaders, you can place a leader object in three different ways: head first, tail first, or content first.

As many of you asked, how do I add a background mask to **Multileader**? Set your background mask in the MText editor, not in the MLeader Properties. Select the **text**, right-click, select Background Mask, and set the border offset factor to 1.05.

1. Explode everything.
2. Select TEST right click, and select Edit Block-In Place "> ok.
3. Click on the text in the background, you'll notice it's locked.
4. Unlock it.
5. Get out of editor.
6. Re Define Block.
